Millennium@EDU World Classroom Partnerships
Connecting classrooms, students and teachers throughout the world

Connecting students and teachers through 1500 Millennium@EDU Model Classrooms in 150 countries under a comprehensive education plan is a Millennium@EDU Educational Project that aims to significantly contribute to the Millennium Development Goals, improving the quality of education, promoting 21st century skills and themes, particularly Global Awareness.

why
Recognizing the importance of promoting Global Awareness through Education, based on 21st century skills such as collaboration, communication, creativity, critical thinking and problem solving will contribute to a better world.

Promoting Global Awareness is empowering students to learn from peers representing diverse cultures and to work collaboratively with them, in a spirit of mutual respect and open dialogue.

Involving students and teachers in a worldwide Educational Plan will allow engaging their communities and families and extend the role of education to create an open society.

how
The Millennium@EDU World Classroom Partnerships will connect 1500 classrooms in 150 countries through 1500 Millennium@EDU Model Classrooms, a complete educational solution of Information, Communication and Scientific Technologies (ICST) for educational and learning purposes, as defined in the Millennium@EDU Solution Pack.

Millennium@EDU World Classroom Partnerships build on an Educational Plan that includes different areas of the curricula: History, Biology, Geography, Literature, Foreign Languages and any other subjects chosen by participant classes and teachers. The Educational Plan opens opportunities for collaboration with other entities which can provide learning resources and support education.

**program goals for students**

The Millennium@EDU World Classroom Partnerships will give students regular and real opportunities to talk, share, learn and collaborate with their classmates and other students all over the world. They will be able to share their lives, interests, aspirations and culture and to explore what each human being has in common and what makes them different.

Developing new communication skills, promoting literacy, collaborative and ICST skills through the students’ direct involvement in global projects as participants and experts, the Millennium@EDU World Classroom Partnerships will help them develop a stronger sense of identity, as individuals and as global citizens.

**program goals for teachers**

The Millennium@EDU World Classroom Partnerships will improve classroom practices, develop effective teaching and learning through collaboration and cooperation with teachers around the world, building an authentic global learning community through collaborative work, showing how teachers can share resources, expertise and support through global collaborative projects.

---

**educational plan**

The Millennium@EDU World Classroom Partnerships work through a comprehensive Education Plan, developed by two classrooms from different countries for a minimum time frame of six months with two activities per month, but the participant classes are free to add more activities and/or to extend the duration of the program which is encouraged by the way it is designed.
