Washington, DC (April 15, 2014) – The [Consortium for School Networking](#) (CoSN) today released a report detailing the association's senior delegation to Portugal last October (October 18-26, 2013). Titled "Reinventing Learning in Portugal: An Ecosystem Approach," the resource explores how the European country has transformed education and society through technology investments and provides delegates' first-hand accounts and lessons learned throughout the weeklong trip.

CoSN's Portugal delegation continued the association's long-term strategic efforts as a global leader in promoting a conversation around issues related to the successful use of ICT / technology in schools. CoSN organizes an annual International Symposium and has led delegations to Europe (2002) Australia (2004), Scandinavia (2007), Scotland and the Netherlands (2009), London and Paris (2011), and South America (2011).
