Empowering the students of today
to create the world of tomorrow.

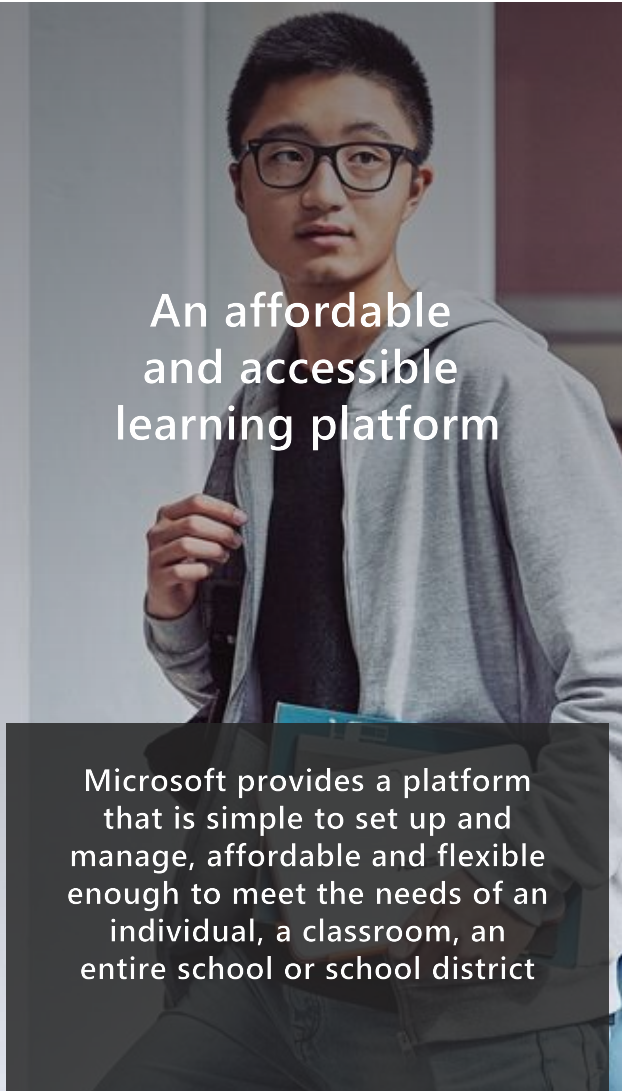

Microsoft Education

Empowering the students of today to create the world of tomorrow

Enabling the right environment for better learning outcomes

Microsoft helps schools and communities build student-centered learning environments that are supportive, inclusive and relevant

An affordable and accessible learning platform

Microsoft provides a platform that is simple to set up and manage, affordable and flexible enough to meet the needs of an individual, a classroom, an entire school or school district

Modern tools for classroom collaboration

Microsoft tools enable students to develop 21st century skills, preparing today's students for tomorrow's jobs

Experiences that spark creativity

Experiences that unlock students and teachers to explore, experiment and express ideas in ways that deepen understanding and connection

A FRAMEWORK FOR TRANSFORMATION

Learning Environments

How are we redefining physical and virtual learning spaces? How do learning spaces support personalized and collaborative learning?

Personalized Learning

How do we optimize learning for each student? How do we support collaboration, creation and production?

Technology Design

Designing Technology for Efficient and Effective Schools

How are we maximizing student safety, data security, and learning? How are we planning for increasing technology needs?

21st Century Pedagogy

Curriculum and Assessment

How will essential skills be developed and assessed? How will we enable deep learning?

Teacher and Leader Capacity

How will we support positive change? What policies enable our vision?

Developing a Learning Community

How do we support communities of practice and inquiry? How do we balance individual needs, community development, and accountability?

Partnerships and Local Capacity Building

How will we engage partners in transformation? How will we involve the community?

Inclusion, Accessibility and Sustainability

How do we ensure all students have access to learning when and where they need? Is it sustainable, scalable, and replicable?

Leadership and Policy

Organizational Capacity, Strategic Planning and Quality Assurance

How will we develop and celebrate a culture of innovation? How do we empower schools to be efficient and effective?

Establishing a Vision

What does an effective learning environment look like? How will we communicate and lead our vision?

Thoughtful Planning = Successful Implementation

Leading Countries of the World

In digital transformation of education

Harnessing the power of learning technologies to build knowledge and human capital for the benefit of all.

What is involved?

- Ground-breaking global partnership between MoEs on education transformation through technology
- Invitation-only group of high level leaders from countries who:
 - Have achieved significant digital transformation with impact on learning outcomes
 - Aspire to achieve digital transformation and have strong political commitment
- Ten countries from across the globe meeting in Dubai in November to plan the next year of activities

LCW Engagement Model

Global Collaboration Platform for Digital Transformation

A digital communications and collaboration platform supporting international dialogue and interaction with additional facilitated regional forums.

Support for Digital Transformation

Ministries will be supported by named Microsoft staff to support global connections, identify areas of best practice and provide support for digital transformation journeys.

Global Education Review for Digital Transformation in Education

Annual conference supported by experts, thought leaders, international organizations, including UNESCO and OECD, World Bank and the international donor community to discuss and assess progress of global digital transformation of learning.

Digital Transformation Library

Identification of leading practice, tool availability and research to better support digital transformation.
