DRAFT CONCEPT NOTE & PROGRAM

Roundtable Financing@EDU – Achieving SDGs

The Case of Mozambique

26 September 2018 - 02:00pm – 6:00pm

United Nations Headquarters, NY City, USA

Conference Room A

Technology can bring outstanding benefits to Education and can be a decisive contribution in achieving the Sustainable Development Goals (SDGs). From Education Management Information Systems (EMIS) to Code Learning, there are many areas where Technology can make a difference by enabling a strong increasing of investment, lowering the costs of operation and presenting better child-level learning results.

Multilateral support and financing currently play a relevant role in many countries concerning the investment and technical support necessary to achieve **SDG 4 – “Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all”**.

Presenting sustainable and innovative educational technological solutions to contribute to the achievement of SDGs, is the objective of this **Roundtable**.

This **Roundtable** is expected to create an opportunity for an open discussion on the role of the private sector in the projects supported by **Multilateral Financing** and to provide better answers on how to create value, to offer innovative solutions and to promote an

inclusive participation of local entities with particular attention to **Micro, Small & Medium Enterprises (MSMEs)**.

Mozambique is doing outstanding work in improving the access and quality of education and deserves the commitment from all interested stakeholders in supporting the development of its education sector.

Africa is showing enormous potential in developing education projects. The work of the African Union in education and technology creates an outstanding context to achieve quality education for All in Africa.

The **Roundtable** will gather around 30 Participants from public institutions and private sector of different countries and global actors in education and ICT.

Draft Program

The **Session** will have a **Roundtable** model in which, after the presentations, the participant entities/companies will be able to provide their input.
