ACCELERATOR WORKSHOP
SESSION: PARTNERSHIP MODELS
Theme 2 - PUBLIC-PRIVATE PARTNERSHIPS
Sustainable@EDU FRAMEWORK POLICY ARCHITECTURE
Sustainable@EDU-PFA
Public Private Partnerships

"A long-term contract between a private party, and a government entity, for the provision of public services and/or development of public infrastructure, in which responsibilities and rewards are shared."

E-Learning Series on Public-Private Partnerships

PPP online training materials have been developed over the years by the ESCAP Secretariat. These materials are for self-study and are tailored to provide a basic minimum knowledge of various issues that policy-makers dealing with PPPs have to be aware of. While the courses are general in nature, most of the examples are from the infrastructure sectors, in particular the transport sector.

The course is divided into several modules addressing the major issues related to PPPs.

- Module 1: PPP Concept, Benefits and Limitations
- Module 2: PPPs Models
- Module 3: Creating a PPP Enabling Environment
- Module 4: Risk Identification & Allocation
- Module 5: PPP Project Cycle
- Module 6: PPP Structure and Financing
Public-private partnerships (PPPs) in education are long-term contractual relationships between the government and a private provider for all or some part of the delivery of education infrastructure and services.
PPP in ICT

“Public-private partnerships (PPPs) are well placed to manage these sorts of complex interfaces and provide a framework for the apportioning of risk between the public and private sector. PPPs in ICT fall into two general categories, broadband and e-government, both of which will be explored within this section.”
